

The World's Only All Stainless Steel Garage Door!

Introducing the garage door that has it all!

When it comes to specialty garage doors, Survivor SS all stainless steel garage door systems go well beyond the extra mile in performance, quality and great looks.

This revolutionary new insulated door system offers all the durability of corrosion, stain and rust-free 300 series stainless steel, while providing the best in thermal protection, reliability and curb appeal that are absolutely crucial in any corrosive, wet or wash down application.

Featuring an all seamless, insulated design, our rigid, high strength stainless sections protect your building while offering a high quality brush finish that maintains a clean, professional appearance for years to come. Teamed up with our incredibly reliable and durable stainless steel; track, springs, rollers and hardware, Survivor SS doors are designed to take the punishment of the world's harshest environments.

Ideal for all applications that demand more, Survivor SS all stainless steel garage door systems are excellent when subjected to wet, corrosive or humid conditions or areas that must be maintained free from rust, bacteria, stains or contamination.

Make your next specialty project all it can be, choose the garage door system that has no equal. Choose a Survivor All Stainless Steel Garage Door and let it be the last door you need, period.

Unsurpassed Durability

Constructed of the toughest corrosion resistant materials available, American's Survivor all stainless steel garage door sections and hardware feature state-of-the-art materials providing maximum life and durability in the most demanding environments.

Unequaled Longevity

Designed for high moisture, high corrosion areas, the Survivor SS door system is all stainless steel right down to the rollers. This makes it the only door system with a lifespan unequaled by any other overhead garage door system anywhere.

Reliable Operation

Designed for demanding high use applications, American's Survivor SS all stainless steel garage doors' offer superior materials and hardware to ensure smooth, easy operation year-after-year.

Low Maintenance

Engineered and manufactured for minimal maintenance and service. Complete door system include sections and hardware that are easy to maintain and clean. Sections and hardware will not stain, corrode or rust. Reduces annual costs and more profit for you.

Complete Weather Protection

Protects people, livestock, product, vehicles, building interior and equipment from wind, cold weather and other hazards. The stainless steel insulated sections offer thermal protection (R-10.0) in any climate. Excellent Energy Savings!

Attractive Appearance

Clean, professional stainless steel look provides unbelievable curb appeal to make your building or facility attractive and inviting for years to come.
