ALL STAINLESS STEEL GARAGE DOOR

**A luxurious alternative to the custom garage door.
Are you ready for Stainless Steel?**

When it comes to high quality garage doors, Legacy stainless steel garage doors go the extra mile in curb appeal, durability, reliability and thermal protection.

With the class and distinctive style of a brushed metal finish, the stunning Legacy door design compliments and enriches the modern architecture of your estate while providing all the benefits of corrosion, stain and rust-free stainless steel.

Protecting your estate year-round in any climate, the seamless, high strength section design of Legacy stainless steel garage doors offer the best in security and structural integrity for your peace of mind. Two inches of high quality insulation ensures that you will also enjoy the benefits of excellent thermal resistance in any climate.

Coupled with the world's toughest and most reliable stainless or galvanized steel track, springs and hardware, your all stainless steel garage door includes heavy duty components to ensure the longest life and reliability for years of dependable service.

Ideal for any residence that demands more, this high quality product is the only choice for applications that insist on the rich beauty and outstanding features that an all stainless steel garage door can bring.

A modern garage door with the elegance & durability that only Stainless Steel can offer.

Crafted for you by:

Make an entrance, with a modern garage door system

Features that impress:

Attractive Appearance

Elegant custom design enriches your home to unbelievable heights of distinction.

Unsurpassed Durability

Constructed of the toughest corrosion resistant materials available, American's all stainless steel garage doors' sections and hardware feature state-of-the-art materials providing maximum life and durability in any environment.

Reliable Operation

All Stainless Steel Doors offer superior design, materials and hardware to ensure smooth, easy operation year-after-year.

Low Maintenance

Crafted for minimal maintenance and service, the All Stainless Steel Garage Door includes sections and hardware that are easy to maintain and clean. Sections and stainless steel hardware will resist staining, corrosion and rust.

Complete Weather Protection

Protects vehicles, building interior and your recreational equipment from wind, weather and other hazards. Our stainless steel insulated sections offer excellent energy savings and thermal protection (R-10.0) in any climate.

Color Compatible

The sleek elegance of stainless steel compliments any exterior. Stucco, brick, clay tile, redwood and glass are accented with the smooth look of stainless steel.
